SUMMARY

B.Tech CSE student passionate about Artificial Intelligence, Software Development, and scalable systems. Experienced in building full-stack applications using React.js, Spring Boot, Node.js, and MySQL, with hands-on exposure to AI/ML-based integrations and REST APIs. Strong problem-solving mindset with the ability to learn quickly, build independently, and ship real-world projects. Interested in modern AI tools, automation, and high-performance application development.

EDUCATION

B.Tech in Computer Science Engineering JECRC University, Jaipur Pursuing CGPA: 9.35	Expected 2027
Senior Secondary (Class XII) Matrix Sr. Sec. School, Sikar RBSE Percentage: 87.20%	2022
Secondary (Class X) Swami Keshwanand Convent School, Sikar CBSE Percentage: 90.20%	2020

SKILLS

Programming Languages: C++, Java, Python, JavaScript
AI & Development: AI/ML Integration, REST APIs, Backend Development, Automation, Prompt Engineering Basics
Frontend Development: React.js, HTML5, CSS3, Responsive UI Design
Backend Development: Node.js, Express.js, Spring Boot
Database & Cloud: MySQL, Google Cloud Platform (GCP)
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Tools & Platforms: Git, GitHub, Docker, Postman, CI/CD
Soft Skills: Problem Solving, Fast Learning, Creative Thinking, Collaboration, Communication

PROJECTS

AWARE — Civic Issue Reporting Platform (Full Stack + AI) Technologies: React.js, Spring Boot, MySQL, REST APIs, SHA-256 GitHub: https://github.com/OVERLORDxx/Aware-Project - Developed a scalable full-stack application using React.js, Spring Boot, and MySQL for real-time civic issue reporting - Integrated AI/ML-based image classification for automated issue detection and intelligent workflow handling - Designed RESTful APIs and backend services for efficient data processing and real-time updates - Improved application performance through modular architecture and optimized backend operations - Collaborated on feature development, debugging, and testing to ensure smooth user experience	2026
Library Management System (Full Stack Web Application) Technologies: React.js, Node.js, Express.js, MySQL, JWT GitHub: https://github.com/OVERLORDxx/library-management-system - Built a full-stack library management system using React.js, Node.js, Express.js, and MySQL - Designed normalized relational database schemas to improve query performance and data consistency - Developed SQL queries and backend APIs for managing books, transactions, and user records - Implemented authentication, validation, and error handling for secure operations - Performed testing and debugging using Postman to ensure data accuracy and application reliability	2026

CERTIFICATIONS

- Organizational Behaviour – NPTEL (IIT Hyderabad) | Elite + Topper (Top 5%) | Score: 93% | [View Certificate](#)
